

# Welcome to Liberty

ENVIRONMENTALLY-FRIENDLY AIR CONDITIONING  
AND HEATING THAT REDUCES OPERATING COSTS  
WHILE INCREASING HOME COMFORT.

**Liberty**  
HEATING & COOLING

## WELCOME TO LIBERTY!

Our customers can be assured that Liberty brand air conditioning and heating systems meet the highest industry standards and are installed by some of the best and most experienced professionals in the industry.

When you choose the Liberty brand, you can rest assured that you'll receive a refreshingly affordable product that's covered by what many consider to be the best product warranties in the heating and cooling industry.

### AIR CONDITIONING SYSTEMS

The Liberty® brand has a central air conditioning system that is perfect for your home — at a refreshingly affordable price. Even on the hottest days of the year, you can keep your home cool and comfortable while

enjoying low energy costs with a high-efficiency Liberty® brand air conditioner. Don't choose between affordability, durability, and optimum cooling comfort. Install a Liberty® brand air conditioner and get all three — and perhaps the best warranty protection in the heating and cooling industry. As you review the various Liberty® brand air conditioners, remember that higher SEER numbers reflect the most energy-efficient systems.

### HEAT PUMP SYSTEMS

Enjoy year-round indoor comfort with a Liberty® brand heat pump. These units provide both cooling and heating comfort from a single system. High-efficiency heat pumps can lower the cost of keeping your home completely comfortable all year. The Liberty brand offers a full line of heat pump systems so you are certain to find the perfect system to fit your budget. Plus you'll get comfort from what many consider to be the best warranty protection in the heating and cooling industry. For the greatest energy-efficiency savings, select a heat pump system with the highest SEER and HSPF ratings.

### GAS FURNACES

Liberty brand gas furnaces deliver warm, money-saving indoor comfort year after year. Variable and multi-speed furnaces can provide enhanced indoor comfort by slowly ramping-up to your thermostat setting rather than simply turning-on at full speed. This alleviates the 'cold air blow' often associated with single speed furnaces. Choose from a full line of Liberty brand gas furnaces that many agree offer the best warranty protection in the heating and cooling industry. To find a gas furnace that delivers maximum energy-efficiency savings, select a unit with the highest AFUE rating.

## ENJOY THE COMFORT OF LIBERTY®

Beat the summer heat with a Liberty® brand Air Conditioner – a unit that provides you with energy savings, outstanding performance, quiet operation and incredible warranties\*. Our air conditioner's problem-free operation and outstanding features add up to supreme comfort and energy-saving value.

### EXPERIENCE QUIET COMFORT

You can be assured that your Liberty brand Air Conditioner will provide you with quiet cooling. To minimize operating sounds, we've acoustically engineered our systems with enhancements that include a compressor sound-reduction cover made of high-density foam and a specially-designed wire discharge grille. Additionally, the two-speed operation of the condenser fan motor allows your outdoor fan to run more often at a lower speed, creating lower operating sound.

### COMMITMENT TO QUALITY ENGINEERING

Always in pursuit of the highest performance and efficiency, our engineers are constantly evaluating the latest and most reliable technology and applying it to every Liberty brand Air Conditioner.

We also design our air conditioners to be some of the easiest to maintain in the industry.

But best of all, the operation of your air conditioner can be reviewed by your contractor with the use of the diagnostics module that we build into all of our premium Liberty brand units. This module monitors data from the unit, accurately detects the cause of system-related issues, and communicates the situation to the contractor through an LED indicator using a series of flash codes.

### SEER/HSPF RATINGS

'SEER' stands for Seasonal Energy Efficiency Ratio, which is a measurement of an air conditioner's cooling energy efficiency. This rating system was developed by the U.S.

Department of Energy to allow comparison between various models of air conditioning systems. Simply stated, the higher the SEER number, the greater its efficiency... and the lower the operating cost.\*\* 'HSPF' provides an efficiency rating for the heating capacity of a heat pump. HSPF is an industry abbreviation for Heating Seasonal Performance Factor. This combination will help to maximize the total savings year-round to heat and cool your home.

\*\* As compared to lower SEER equipment.

**Unmatched performance, efficiency and affordability. That's just what you'll get with Liberty.**

## HEAT PUMP PERFORMANCE

Liberty heat pumps operate all year long providing comfort to your home. When cooling is needed, the heat pump operates just like a typical central air conditioner. It efficiently cools the indoor air in your home providing enhanced comfort on even the hottest days of the season. As the season changes, and your home requires warm air for

optimum indoor comfort, the heat pump literally reverses its operation and creates heat that keeps your home comfortable during cold winter days and nights.

We take pride in our manufacturing and build each unit carefully. We rely on strict, quality-driven processes to build well-designed, top-quality, thoroughly tested products,

backed by the best standard and extended warranties in the industry. We leak-test every single heat pump three separate times during the manufacturing process, and we run-test each unit before shipment. This quality focus insures a trouble-free installation and a long product life.

## R-410A REFRIGERANT

With regard to indoor comfort, every homeowner wants their HVAC (Heating, Ventilating, and Air Conditioning) system to provide the perfect balance of optimum temperature control, enhanced indoor air quality, and maximum energy savings, coupled with dependable and reliable operation. And, today more and more homeowners want their HVAC system to be environmentally friendly or defined as 'green'.

As a leading HVAC manufacturer, everyone associated with Liberty heating and cooling products shares the same quality, comfort, economical, and environmental goals as homeowners. Since the first day of operation, the folks at the Liberty brand have

been focused on building high-quality heating and cooling products that deliver outstanding comfort, money-saving efficiency ratings, and durable systems that are refreshingly affordable.

The refrigerant used in any residential air conditioning or heat pump system is central to its performance. The refrigerant is substance that helps the indoor coil system remove heat from your home indoor air and transfer that heat to the outside. This transfer is what air conditioning possible.

## ENERGY EFFICIENCY IS KEY...

### TO CONTROLLING THE COST AND COMFORT OF HEATING YOUR HOME.

The Liberty® Gas Furnaces are the answer to your family's heating needs. Liberty has always been a leader in providing high-quality heating products at a refreshingly comfortable price.

Now, with new patented technology, the Furnace will provide you with even-temperature warmth, improved air quality and quiet operation. Plus you'll save on utility bills thanks to your furnace's performance.

### FOR CONSISTENT HEATING COMFORT YOU CAN COUNT ON.

Unlike conventional, single-stage furnace technology, Liberty's technology eliminates the temperature swings resulting from abrupt, high-stage stops-and-starts of the furnace by operating at a low heating stage the majority of the time.

This enables your Liberty furnace to gradually and pleasantly increase the temperature of your home environment. And if low-stage heating doesn't warm your home to the desired temperature quickly enough, your Liberty Gas Furnace shifts into high stage to ensure your comfort.

### OTHER BENEFITS OF LIBERTY PATENTED TECHNOLOGY INCLUDE:

- Quiet furnace operation
- Virtual elimination of the stagnant pockets of air that can form when the furnace stops running
- Increased air filtration providing improved air quality

The components of your Liberty Furnace have been specially selected to reduce the noise levels common in other furnaces. Plus, we house these components in a fully insulated, heavy-gauge steel cabinet. The result? Extra-quiet comfort.

## QUALITY MANUFACTURING BACKED BY WARRANTIES AND SERVICE

Every Liberty brand indoor comfort product is built to the highest standards of the heating and cooling industry, and in many cases exceeds those standards. The high quality of our product warranties reflects the high standards of our manufacturing processes. As a heating and cooling contractor, our founder, Harold Liberty knew firsthand the concerns that homeowners expressed when it came to purchasing and installing a new central indoor comfort system. That's why all Liberty brand products provide industry leading comfort and warranty protection. Why would you settle for anything less?

### STANDARD WARRANTY

Every Liberty brand product is protected by a limited warranty on all functional parts. You'll find specific warranty protection coverage listed with the product features, or you can check the warranty certificate, or your installing dealer will have the details.

Full details on the standard limited parts warranty are available for each of our featured products. To view the warranty certificate for a specific product, please click on Product on the left navigation bar and then selected the product of choice. At the bottom of the product page you will find a warranty link to the warranty certificate.

### SPECIALIZED COMPONENT WARRANTY

To ensure your satisfaction with Liberty brand heating and cooling systems, special warranties are available on select products and components. For example, some Liberty brand gas furnaces carry industry leading limited warranty protection on the heat exchangers and specific Liberty central air conditioning systems carry exceptional warranty protection on the compressor.

**Here are just a few of the specialized warranties\* available:**

- Lifetime Limited Compressor Warranty\*
- Lifetime Limited Heat Exchanger Warranty\*
- 10-Year Parts Limited Warranty\*
- 10-Year Unit Replacement Limited Warranty\*

\* To receive extended warranty term, online registration must be completed within 60 days of installation.

You can choose the product or system that has the warranty that meets, or even exceeds, your indoor comfort needs.

### EXTENDED SERVICE PLANS

With a Extended Service Agreement, you'll have your choice of 5-years, 10-years, or even up to 99-years of worry-free comfort without the unexpected cost of replacement parts or labor expenses should your Liberty equipment require service. If a repair is needed, an Authorized GoodCare Dealer will respond promptly and make repairs with quality Liberty parts.

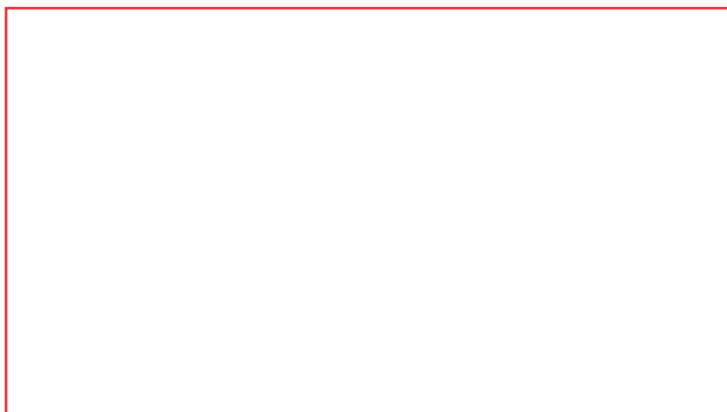

GoodCare coverage is affordable, costing only pennies a day. It's a valuable investment that protects you today and in the future, no matter how much the cost of service may increase over the life of your Liberty brand equipment. With a GoodCare extended service plan, your comfort is in the guarantee.

When it comes to worry-free warranties, Liberty Manufacturing stands behind its products equal to any other brand in the indoor comfort industry.

For more information about Liberty Air Conditioning and Heating Systems and warranties, call or visit your local Liberty dealer for complete details:

Our continuing commitment to quality products may mean a change in specifications without notice.
